YOU HAVE RECEIVED 8 CONSECUTIVE ARROW PROMPTS (=>  
The arrow (=>) is the system prompt, where you enter a command. For  
an explanation of system commands, files, formats, etc., enter "HELP"  
and the name of the item you want explained at an arrow prompt (=>).  
Enter "HELP COMMANDS" for a list of commands that can be used in this  
file. Enter "HELP MESSAGES" for a list of online explanations that  
are available. The "?" can be used as a synonym for "HELP".

Help is also available at any prompt, and after any error message.  
Enter "HELP" or "?" at a prompt to see an explanation of the options.  
After an error message, enter "HELP" or "?" at the next prompt and you  
will receive a more detailed explanation of the error and how to

correct it.

Automatic help is also available. When AUHELP is 'ON', you will automatically receive help following an error message. For more information on AUHELP, enter "HELP SET AUHELP" at an arrow prompt (=>).

Users who need additional assistance can contact the Help Desk at their nearest STN Service Center. Enter "HELP STN" for information on STN Service Centers. You may also choose to contact the database representative for the file you are searching, for more detailed help on database content and search strategy. For information on how to contact database representatives for the current file, enter "HELP DESK" at an arrow prompt (=>).

IF YOU REQUIRE FURTHER HELP, PLEASE CONTACT YOUR LOCAL HELP DESK

LINE COUNT: 1991  
CAS INDEXING IS AVAILABLE FOR THIS PATENT.

AB The present invention relates to methods of screening for compounds that bind RNA molecules. In particular, the methods of the invention comprise screening a library of test compounds, each of which is attached to a solid support, with a dye-labeled RNA molecule to form a dye-labeled target RNA:support-attached test compound complex. By virtue of the dye label on the target RNA, the support becomes labeled and can be separated from unlabeled solid supports. The present invention further relates to methods of inhibiting an RNA-protein interaction, to methods of screening for compounds that increase or decrease the production of a protein, and to methods of screening for a compound that is capable of treating or preventing a disease whose progression is associated with an in vivo binding of a test compound to a target RNA.

CAS INDEXING IS AVAILABLE FOR THIS PATENT.
